

# Day 4 - Dynamic Frontend Components - Morent

## Primary UI Components

### 1. CarCard

Description: Displays information about a car, including its title, type, and action buttons for renting or favoriting the car.

### 2. CarCardMainContent

Description: The main content area of the CarCard, showcasing the car's title, type, and interactive elements like favorite buttons.

### 3. CarDetailsModalOne

Description: A modal component that presents detailed information about a car, including images, reviews, and options for renting or reviewing.

### 4. CarDetailsModalTwo

Description: Another modal component for displaying additional details or actions related to a car, enhancing the user experience when interacting with car listings.

### 5. ReviewForm

Description: A form component that allows users to submit reviews for cars, facilitating user feedback and interaction.

### 6. ReviewList

Description: Displays a list of reviews for a specific car, allowing users to see feedback from others and make informed decisions.

### 7. AdvertsDisplay

Description: Showcases advertisements related to car rentals, highlighting key features and offers to attract user interest.

### PickUpDropOffCard

Description: A component that allows users to select pickup and drop-off locations for their car rental, integrating location selection functionality.

### CheckoutForm

Description: A form component that integrates with Stripe for processing payments, allowing users to complete their car rental transactions securely.

### 10. Toaster

Description: Displays toast notifications to users, providing feedback on actions taken, such as successful rentals or payment confirmations.

### CarForm

Description: A form component for adding or editing car details, including images, title, brand, and price, facilitating user input for car listings.

#### 12. CarFormImagePreviews

Description: Displays previews of images uploaded for a car, enhancing the user experience when adding or editing car details.

#### 13. ModalCarDetails

Description: A modal component that displays detailed information about a specific car, including features, specifications, and rental options.

#### 14. CarFormButtons

Description: A component that provides action buttons for submitting or canceling actions within the car form, enhancing user interaction during the car listing process.

#### 15. CarFormHeader

Description: Displays the header section of the car form, providing context for whether the user is adding a new car or editing an existing one.

#### InputController

Description: Manages input fields within forms, ensuring proper validation and state management for user inputs related to car details.

#### SelectInput

Description: A dropdown component for selecting options related to car attributes, such as type, transmission, or fuel capacity, facilitating user choices during the car listing process.

#### Location

Description: Integrates location selection functionality, allowing users to specify pickup and drop-off locations for their car rentals.

#### 19. StripePayment

Description: A component that integrates with Stripe to handle payment processing for car rentals, ensuring secure transactions and user-friendly payment experiences.

#### 20. FavoriteCars

Description: Displays a list of cars that the user has marked as favorites, allowing easy access to preferred rental options.

#### 21. ProfileHeading

Description: A component that displays the user's profile information, including their rented cars and personal details, enhancing user engagement with their account.

#### FilteringContent

Description: Provides filtering options for users to narrow down car rental choices based on various criteria, improving the search experience.

ShowMoreCars

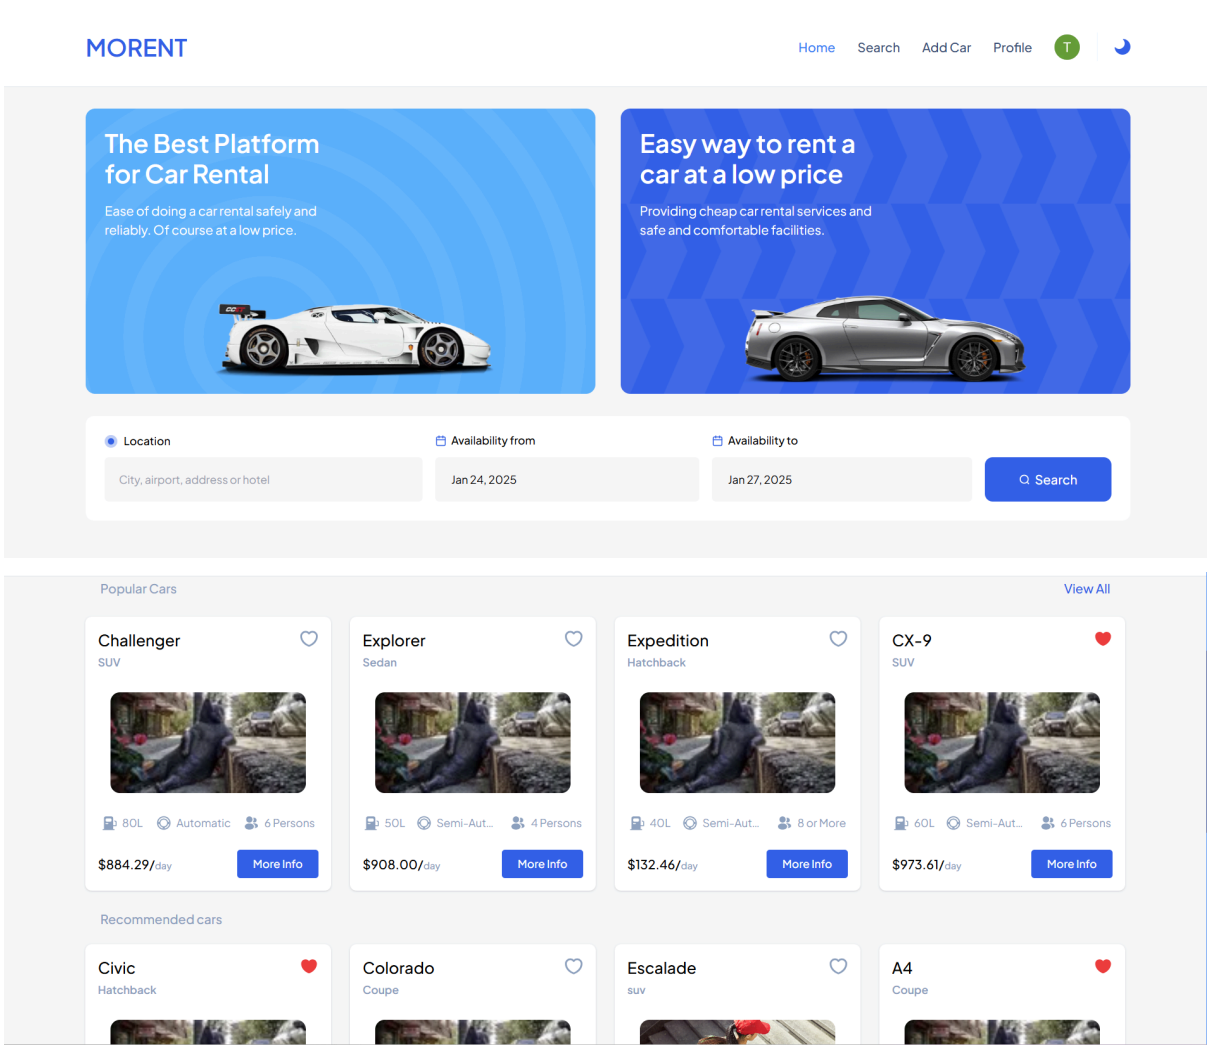

Description: A component that allows users to load more car listings, enhancing the browsing experience by providing additional options without refreshing the page.

CarDetails

Description: Displays comprehensive information about a car, including specifications, rental terms, and user reviews, aiding users in making informed decisions.

25. CarRentButton

Description: A button component specifically designed for initiating the rental process for a car, streamlining user actions.

### Clean Car with Noisy Engine

★☆☆☆☆ 1 star

The pick-up was quick, but the car had some dents. It drove well, though.

### Great Car, A Bit of Wait

★★☆☆☆ 2 stars

Average car, nothing to rave about. But it got the job done.
