# API Integration report: Morent

*Prepared By: Talha Ali*
*Date: 17/1/2025*

## 1. API Integration process

At first, I initialized Sanity in my old hackathon project with the front end and defined car schemas. After that, I wrote a script to migrate data from the provided API to sanity CMS.

## 2. Adjustments made to schemas.

I added fields for Stripe payment, such as payment ID, and wrote schema for orders, categories, and other fields.

## 3. Migration steps and tools used.

No external tools just some scripts and mock api data provided by sir Asharib and sanity module

## 4. API call screenshot
